

## 24/7 Access to all your applications, in one place.

Focus on your core business and scale quickly as your brokerage adapts to market changes. Cloud allows you to easily access all things infrastructure, application, and database related. Go live faster with the highest standards of security and compliance while safely leveraging a full suite of comprehensive managed solutions wherever and whenever you want.

### Broker benefits

- **Improved operational simplicity:** Save money by avoiding upfront and recurring infrastructure and hardware maintenance, as well as lower cost of ownership. Benefit from operational simplicity through reduced back office IT efforts and expenses.
- **Ability to adapt:** Easily and quickly adjust your IT Footprint as the needs of your business change. There's no need to scale up or down your IT department or buy additional hardware. Instead, quickly adapt to your ever changing and sometimes unpredictable business needs with one phone call.
- **Gain peace of mind:** Architected with the highest standards in security and compliance, a significant investment has been implemented to ensure the brand new hardware infrastructure is validated with various penetration tests and engineered with multiple security layers. Sleep easy knowing the Cloud environment is more secure, performant and reliable than ever before.
- **Improved storage and data:** Benefit from a database that is proactively maintained and optimized. Data storage is enhanced due to improved latency speed and follows Disaster Recovery best practices.
- **Enhanced productivity:** Go live quicker with your solutions and help drive ROI sooner. With 99.9% up time, you can leverage the physical environment to ensure reliable fault tolerant systems, timely off-site backups, and disaster recovery planning. Take advantage of doubled processing power and significantly increased memory.
- **Expert knowledge:** Seek out deep knowledge of the applications with a comprehensive suite of end-to-end managed services, from infrastructure and database to application and user setup, so you can service clients more efficiently.

"The change since onboarding Vertafore Canada's Cloud is nothing short of amazing. Compared to our old server, the increase in speed is night and day. Another benefit is having the ability to use Chrome or Firefox to launch the server rather than being stuck with Internet Explorer. The look of the store front is cleaner and more apps are available. We at SurNet couldn't be any happier with this platform."
